TechEd Hands-On Recorder — Cheatsheet

Overall Flow

Step	Who	Command
1. Start recording	Claude runs	`hands-on-record ex0`
2. Navigate & click through exercise	You, in the browser	—
3. Quit & save	You, in terminal UI	`q`
4. Generate screenshots	Claude runs	`hands-on-capture ex0`
5. Write README	Claude	—
6. Commit	Claude runs	`git commit`

While Recording — Keyboard Shortcuts

Key	What it does
`g`	Go to a URL (type address, browser navigates + logs in)
`c`	Record a click (then click the element in the browser)
`f`	Fill a text field (pick field, type value)
`s`	Take a screenshot + add annotation bubble
`w`	Wait / pause for N seconds
`z`	Undo last step
`e`	Jump to a step / edit it
`q`	**Quit and save**
`Esc`	Cancel current operation

Fixing Mistakes

Situation	Command
Undo last step (during recording)	`z`
Resume a recording you quit	`hands-on-record --resume ex0`
Resume from a specific step	`hands-on-record --resume --step 3 ex0`
Redo all screenshots (no re-recording)	`hands-on-capture ex0`

Tips

- After each action, the UI asks **"Screenshot here?"** — say yes for steps participants need to see, no for in-between steps
- Login happens **automatically** via your `.env` credentials — no need to record login steps
- `recording.json` is saved after **every step** — safe to quit anytime
